## **DETAILED ACTION**

### ***Continued Prosecution Application***

1. The request filed on 12/18/01 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/419,748 is acceptable and a CPA has been established. An action on the CPA follows.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5-7 and 19-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Michalovic.

Michalovic discloses (Fig. 3 and 7) the invention including a first side portion (see Fig. 7, a left side portion of a tear surface means 37), a second side portion (see Fig. 7, a right side portion of a tear surface means 37), a fixed position 49 relative to the path (Fig. 3), a roughened surface 38 (see col. 5, line 24-26), a center portion (see Fig. 7, a middle side portion of a tear surface means 37) and a rounded surface, a member 40, a substantially semi-circular lateral cross-section (see. col. 5, line 28-31).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michalovic in view of Ishii et al.

Michalovic discloses the invention substantially as claimed except for a tapered surface. However, Ishii teaches the use of a tapered surface (see Fig. 1) for the purpose of increasing the separation of the ticket. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Michalovic's tear surface means as taught by Ishii in order to obtain a better separation of the strip of media.

***Allowable Subject Matter***

6. The indicated allowability of claims 1, 5-7, 19, and 25-29 are withdrawn in view of the newly discovered reference(s) to Michalovic and Ishii et al.
